Highly skilled and experienced **Software Developer** with a passion for creating innovative and effective solutions for clients in a range of industries. Proficient in a variety of programming languages, including **Java, Javascript, and Python** and experienced in agile development methodologies. Strong problem-solving abilities and a team player with a track record of delivering high-quality projects on time and within budget. Committed to ongoing learning and professional development to stay up-to-date with the latest technologies and best practices.

Work Experience

Software Developer at Berg Software

Berg Software is an outsorcing company that provides dedicated developement teams and team extension solutions to major software companies. My main responsabilities are:

- Develop, maintain, test and improve existing Java / Spring REST API services by reducing dependencies, refactoring with the usage of TDD making the application more robust and reliable.
- Develop and maintain efficient APIs that are reliable, easy to maintain and catering to all internal and external client needs using the Neonbee framework.

Software Developer at Vlinde Transylvania

Vlinde is a German based web design agency that pays special attention to the customer experience with their offered services . Below are some of the key tasks I am involved in:

- Develop, maintain and improve existing PHP / Laravel applications and services by reducing dependencies and refactoring the code base, resulting in lighter, more secure and faster applications.
- Design and develop scalable mobile applications using Angular, the Ionic framework and Firebase Services, resulting in a fast MVP tailored to customer needs and ready to go to market.
- Build microservices and automation tools using Python and Docker.

Skills

Programming Languages
Java, Javascript, Python

Libraries & Frameworks
